

360° protection for Microsoft 365

**More than
secure—
empowered
protection**

Microsoft 365 powers your business, but it doesn't protect your data from accidental deletions, ransomware, or compliance gaps.

We deliver an all-in-one service to safeguard your **Microsoft 365 data**—emails, files, Teams conversations, and more—while ensuring business continuity and compliance.

Key Benefits

Zero Data Loss: Automated, continuous backups ensure every change in your M365 environment is saved and recoverable in seconds.

Reduced Downtime: Rapid recovery restores emails, files, or Teams data in minutes, keeping your business running smoothly.

Enhanced Security: Advanced anti-phishing and anti-malware tools block 99% of email-based threats before they reach your inbox.

Simplified Compliance: Meet industry standards with secure data storage and easy audit reporting.

Cost Efficiency: All-in-one protection reduces the need for multiple tools, saving time and resources.

Why us for M365?

Microsoft's Shared Responsibility Model means they secure their platform, but your data is your responsibility. Without backup and advanced cybersecurity, your business risks downtime, data loss, or costly breaches.

We combine automated backups, smart email security, and real-time threat protection to keep your M365 environment secure and resilient.

Core Features

- **Continuous Data Backup:** Protects emails, OneDrive files, SharePoint sites, and Teams data with automated, incremental backups.
- **Smart Email Security:** AI-powered filtering stops phishing, spam, and malware targeting your M365 mailboxes.
- **Ransomware Protection:** Real-time detection and automatic recovery blocks ransomware and restores affected data instantly.
- **Compliance Tools:** Secure data retention and granular recovery options to ensure compliance with regulatory requirements.

Who benefits most from protecting M365?

Businesses that rely on Microsoft 365 and need robust data protection and cybersecurity. Our services are ideal for:

-  **Small and medium businesses:** Protect critical M365 data (emails, OneDrive files, Teams chats) without complex IT setups, ensuring your team stays productive.
-  **Remote and hybrid teams:** Secure data across distributed workforces, with fast recovery to keep projects on track, even after accidental deletions or cyberattacks.
-  **Regulated industries:** Simplify compliances through secure backups and audit-ready reporting, reducing legal and financial risks.
-  **High-email-volume organizations:** Block sophisticated phishing and malware attacks, safeguarding your M365 mailboxes from costly breaches.

Advantages of working with us

- **99.9% threat detection rate:** Our managed services, powered by Acronis, help you block 99.9% of email-based threats like phishing and ransomware, compared to the industry average of 85%.
- **Reliable recovery when it matters most:** Quickly restore lost or compromised Microsoft 365 data—emails, files, or Teams—with confidence. Our service ensures your business stays operational, avoiding disruption and data loss.
- **Reduce overhead and simplify operations:** Businesses that rely on our expertise cut complexity by centralizing these critical services under one trusted partner—instead of managing everything on their own.
- **100% IT Coverage:** Protect every M365 component—Exchange, OneDrive, SharePoint, and Teams—with a single, scalable managed service that delivers full visibility and peace of mind, without the hands-on burden.
